Subject index

Affinity membranes, 69
Air sparging, 183
Aluminum nitrate, 91
Amphiphilic quaternary ammonium ion, 141
Anaerobic digestion, 131
Aroma compounds, 251
Asymmetric membrane, 141

Bipolar membrane, 283
Blended membranes, 199, 207
BSA, 183
Bulk membrane stability, 101

Capillary membrane, 191
Catalytic dehydrogenation, 11
Ceramic membrane cleaning, 131
Charged ultrafiltration membranes, 141
Co-ion leakage, 283
Combined film and membrane diffusion control, 109
Composite membranes, 21, 37, 55, 69, 81, 91
Compressibility, 191
Copper ion transport, 101
Coupled transport, 101

Defect elimination, 213
Dextrans, 183
Diffusion, 231
Diffusional rate-determining step, 101
Donnan dialysis, 109
Dynamic contact angle analysis, 37

Electrochemical, 161
Electrostatic barrier, 141
Extraction, 161

Fluorination, 21, 37, 55
Fouling tendency, 131

Gas permeabilities, 151
Gas separations, 1, 11, 21, 37, 55, 81, 117

Hydraulic resistance, 191

Immersion precipitation, 231
Inorganic membrane, 1
Ion fluxes, 283
I-V responses, 283

Ligand exchange model, 131

Mass transfer coefficient, 191
Membrane preparation and structure, 55, 231
Membrane reactors, 11, 161
Metal membranes, 11
Microporous polysulfone hollow fibers, 69
Modelling, 161

Nernst–Planck equations, 109, 173
Network approach, 173
Non-steady state kinetics, 101

Organic/organic separation, 265
Oxygen/nitrogen permselectivity, 81

Performance and structure, 207
Perselectivities, 151
Pervaporation, 91, 251, 265, 275
Pervaporation membranes, 199, 207
Pervaporation separation index, 91
Phase inversion, 231
Plasma polymerization, 81
Poly(acrylic acid), 91, 265
Polyacrylonitrile, 91, 141
Poly(2,6-dimethyl-1,4-phenylene oxide), 21, 37
Polymer blend, 231, 265
Polymer membranes, 117
Polypyrrolone, 117
Poly[1-(trimethylsilyl)-1-propyne], 81
Poly(vinyl alcohol), 265
Poly(vinyltrimethylsilane), 55
Post-treatment, 213
Preparation, 199
Pretreatment, 131
PSPICE modeling, 173

Recombinant protein A, 69
Resistance-in-series model, 251

1994 Elsevier Science B.V.
SSDI 0376-7388

Segmented 6F polyimides, 151
Selective adsorption, 1
Selectivity enhancement, 213
Separation of water–alcohol mixtures, 275
Silicalite-1, 1
Silicone, 251
Solvent treatment, 213
Sorption measurement, 251
Structure/property relationship, 151
Surface modification, 21, 37, 55
Surface treatment, 213
Synthesis, 161

Temperature, 117
Three block copolymer membranes, 275
Transport in membranes, 173
Two-phase flow, 183

Ultrafiltration, 91, 183, 191

Water-splitting, 283

X-ray photoelelectron spectroscopy, 37

Zeolite membrane, 1
